MARITIME CONFERENCE 2009

COMBINED JOINT OPERATIONS FROM THE SEA CENTRE OF EXCELLENCE

MARCH 31 - APRIL 2, 2009 • SORRENTO, ITALY

Delivering Maritime Security in Global Partnership: Improving Collective Capabilities

The aim of this conference is to build on our successful May 2008 conference by highlighting further developments in regional maritime security partnerships around the world. The conference will also focus on the information sharing standardization initiatives which are currently underway and update attendees on policy developments in specific areas

of topical interest such as the Integrated Coast Guard initiative recently signed off by the Maritime Organization for West and Central Africa under the auspices of the International Maritime Organization and the emerging policies for countering piracy off Somalia. At the end of the Conference, attendees should have a better understanding of the regional maritime security initiatives already underway and those that represent "Best Practice". They should also understand fully how they may engage further in Global Maritime Security.
